

BE my monogram

This font contains 26 serif uppercase letters:

A B C D E F G H I J K L M
N O P Q R S T U V W X Y Z

and 26 cursive lowercase letters:

abcdefghijklmnopqrstuvwxyz

You will need a software that allows you to layer text. Both Cricut and Silhouette allow this functionality.

You would type the uppercase initial that you want in one text box, and in a separate text box, type the lowercase name in cursive. Then move the textbox with the name over the box of the initial.

If you need any further assistance with this, please [contact me](#) and I will be happy to help you.

BE *my monogram*

This guide contains all the special characters in this font that you can copy and paste into your document.

Important Notes: When you paste the glyphs into your document, it might show up as a rectangular box (sometimes blank, with a question mark, or with an X). Just select the boxes and change the font back to Be My Monogram

Also, keep in mind that if you were to change a bunch of text to these alternates, and then later change the font to something else, the boxes will replace the alternates (since those same alternates would not exist in the other font).

If you encounter any issues with the font, please let me know and I will be happy to help you solve them.
